REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claims 1-29 is the inclusion of the limitations of an apparatus for driving and tensioning a ribbon that includes supply dancer means for applying tension to the ribbon, the supply dancer means being positioned downstream of the supplying means, the supply dancer assembly having a supply dancing arm pivotally mounted on said housing and a supply channel affixed to said housing, a portion of said supply dancing arm being capable of moving in and out of said supply channel; and take-up dancer means for applying tension to the ribbon, the take-up dancer means being positioned downstream of the printhead, the take-up dancer assembly having a take-up dancing arm pivotally mounted on the housing and a take-up channel affixed to the housing, a portion of said take-up dancing arm being capable of moving in and out of the take-up channel. It is these limitations found in the claims, as they are claimed in the combination of that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schartner (US 6,313,861 B2) discloses a thermal transfer printer with film saving system and print media tensioning system. Loos (US 5,808,654) discloses an apparatus for printing graphic images on sheet material having an ink web cassette with constant web tension. Harrison (US 5,748,204) discloses a hybrid imaging system capable of using an ink jet and thermal dye transfer imaging technologies on a single image receiver.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
